

Mehmet Ali Selek

Front-End Developer

ABOUT ME

Hi, I'm Mehmet Ali. I'm 22 years old, and for the past three years, I've been developing projects fueled by my passion for the software world. I began my career in web development, and after getting acquainted with React, the scale and complexity of my projects significantly increased. I enhanced my expertise in mobile application development with React Native, focusing particularly on augmented reality (AR) projects. I developed innovative applications with features like camera integration and scene navigation, prioritizing user experience.

I have achieved successful outcomes in various projects, both individually and through teamwork. In addition to my software skills, I am also developing myself in the field of design. I serve as the Head of Design and Media at Nibgat® Community as a volunteer. I actively use Figma in my design projects and create 3D models with Blender to deliver creative works.

I continue to acquire new knowledge and improve myself every day, aiming to add value to the world of technology and design.

EDUCATIONS

• 2022 - 2024

Konya Teknik University
(Computer Science)

EXPERIENCE

• 2023 / 2024 July
(Total 2 Months)

Konya Organized Industrial Zone Directorate
Network and System Unit

• 2024 February - Active
